Guidelines:

Every Tuesday and Thursday, students will be expected to watch the recorded course video, make notes, and follow up with the assigned homework. Students will be expected to complete and submit the given assignments on time before the beginning of the next class to be able to move forward to the next class. Every Saturday, the students are expected to schedule an individual call with the Supervisor to discuss the course material, receive feedback on homework assignments, and discuss one unique case study. In the second half of the internship, students will begin to design and conduct their own research project in Sport Psychology. The course ends with a presentation of the Research Project to the Supervisor and a closing discussion. Please see the course schedule for a break-down of the course structure and timeline.

Structure Summary:

Students will watch 2 videos a week, complete 2 quizzes a week, and 2 assignments a week, and complete one individual call with the supervisor each week. The first half of the internship introduces students to the foundation and applications of Sport Psychology, while the second half of the internship sees students conduct and present their own Research Project on a topic in Sport Psychology guided by the supervisor.

Log In Details:

All course material will be available online. Please Use the Log In Details Sent to You via Email to access the course on the website www.kunashni.com
